

RAELENE VALESKA DOOKKOO

Final-Year Bachelor of Information Science (Informatics) | University of Pretoria

063 508 7978 | raelenevdookkoo@gmail.com | [linkedin.com/in/raelene-dookkoo](https://www.linkedin.com/in/raelene-dookkoo) | [RaeleneV.github.io](https://github.com/RaeleneV)

PROFILE

Final-year Bachelor of Information Science (Informatics) student with broad experience across systems analysis, information architecture, web development, project management, and digital design. Experienced in transforming complex requirements and information into structured, user-focused digital solutions through academic, community, and team-based projects. Combines analytical problem-solving with creative design, strong information organisation, and project coordination, with a particular interest in building practical and engaging digital experiences.

TECHNICAL SKILLS

Web Development: HTML, CSS, JavaScript, jQuery, responsive design, MVC, GitHub

Systems Analysis: Requirements analysis, UML diagrams, use case narratives, business process modelling, wireframing

Information Architecture: Content organisation, metadata, classification, navigation design, document management

Visual Design: Design principles, visual hierarchy, aesthetic and functional evaluation, design in digital environments

Publishing & Content: Copy-editing, proofreading, digital and print content production, layout and typography

Software Development: C# and JavaScript, object-oriented programming, debugging, testing

Database Management: Advanced SQL, database lifecycle management, transaction management

Project Management: Jira, GitHub Kanban, Google Workspace, task planning, milestone tracking, team coordination

Adobe Creative Suite: Photoshop, Illustrator, Animate, graphics, photo editing, and animation

Platforms & Tools: SharePoint, Microsoft 365, Google Drive, GitHub, InDesign, Acrobat

KEY STRENGTHS

Analytical & Systems Thinking:

Analyses complex systems, identifies patterns and relationships, breaks problems into manageable components, and evaluates solutions systematically.

Problem Solving & Continuous Improvement:

Approaches unfamiliar problems as systems to investigate; tests solutions, evaluates outcomes and iteratively improves processes, interfaces and documentation.

Information Organisation:

Structures complex information into clear hierarchies, taxonomies and workflows; maintains organised, searchable documentation across digital and physical environments.

Project Coordination & Initiative:

Takes ownership of project organisation; establishes roadmaps, manages Jira/Kanban workflows, tracks tasks and creates structures that keep teams aligned and progressing.

Creative & User-Focused:

Combines visual design with usability and functionality to create clear, intuitive and purposeful digital experiences.

Technical Communication:

Translates technical concepts and requirements into clear, accessible information for non-technical audiences; creates detailed documentation and structured project resources.

WORK EXPERIENCE

Administrative Support, Dookkoo's Woodcraft

2020 – Present

- Managed invoicing, payment processing, financial records, and operational documentation for a small business, ensuring accurate record-keeping and supporting efficient daily operations.
- Improved information organisation and document accessibility, contributing to more efficient workflows and reducing time spent locating critical business information.

VOLUNTEERING

Volunteer, New Life Church & RCS Primary School

2014 – 2020

- Sustained volunteer support across church and school settings, contributing to childcare, leadership, administration, hospitality, and office coordination activities.

References available on request.

WORK INTEGRATED LEARNING

Informatics, Systems & Web Projects, University of Pretoria

2021 – Present

- Built responsive websites and web applications using HTML, CSS, JavaScript, and C#, both individually and in teams.
- Produced complete system specifications including UML diagrams, use case narratives, activity diagrams, and wireframes.
- Worked with advanced database concepts including transaction management, stored procedures, and database lifecycle.
- Created motion graphics, infographics, and a comic book portfolio applying visual design and publishing principles.
- Customised SharePoint environments for team information management; managed tasks and milestones using Jira and GitHub Kanban.
- Consistently took the role of team leader and project manager across group work, setting roadmaps, delegating tasks, tracking milestones, and keeping documentation in order.

Community Based Project (JCP202) – Team Leader, Keep That Gold Shining – 91%

2023

University of Pretoria, formal graded project module (undertaken as a genuine community volunteer initiative)

- Planned, managed, and delivered a community initiative from inception to completion.
 - Applied project management principles including goal setting, scheduling, task delegation, and stakeholder reporting in a real-world context.
 - Led a volunteer team delivering computer literacy education to high school students in rural communities, helping increase awareness of digital skills and technology access.
 - Coordinated full programme planning, task delegation, scheduling, and delivery across the team, ensuring the successful execution of project objectives.
 - Produced educational videos and digital awareness materials on technology access and digital literacy that supported community engagement and learning initiatives.
-

EDUCATION

Bachelor of Information Science, Informatics

2021 – 2026

University of Pretoria – Expected graduation: November 2026

- Core modules: Systems Analysis & Design, Web Development, Database Management, Information Architecture, Visual Design, Multimedia, Publishing, Business Management.
- Distinctions in: Academic Information Management (85%), Information Science modules (83%, 81%, 79%, 78%, 75%, 83%), Database Management (81%), Community Project (91%), Project Management (93%).

Certificate: Personal and Company Income Tax for Beginners

2024

Udemy – Self-initiated and completed independently to broaden knowledge beyond core studies

Certificate: Next-Generation Cyber Security

2024

Huawei Certification – Self-initiated and completed independently to broaden knowledge beyond core studies

National Senior Certificate (Matric)

2019

HTS Witbank

INTERESTS

Painting & Art · Reading Fiction · Web design & Digital creativity · Continuous Learning · Problem Solving & Systems Thinking
